

Natural Disasters!

10	Draw or collage a volcano.	Find out the symbols used in a weather report. Can you draw and label them?	Measure and record the temperature at different times of the day.
20	Find out the names of different storms and write them alphabetically.	Create a poster about a Natural Disaster you have found out about.	Bake something with a topic link e.g) "rocky" road or chocolate lava cake. The more tenuous the better!
30	Create a survival kit for a natural disaster. What would you need to keep safe?	Design a building that could survive an earthquake. What features might it need?	Draw a colour-coded map of your house identifying areas that would be safe (green) and dangerous (red) in an earthquake.
40	Create a video of your own weather report using a map to describe the weather in different places.	Create a 3D model of any natural disaster and video it in action. (We will be doing volcanoes in school)	Mystery Project! Gain 40 points for a really cool piece of homework of your choice!

Mega Project!

Find out about and teach the class about a natural or man-made disaster.

1. Create a news report as if you were there.
2. Make a powerpoint full of pictures and information.
3. Explain how the disaster occurred.
4. Present information about the country where the disaster occurred.
5. Compare this disaster to other similar ones.
6. Write a quiz for the class to test how much they have learned from you!
