

# Times Table Knockout!

Throw 2 dice (1–6). Multiply the numbers together and put a counter on the answer. If you get the same answer twice, you can put another counter on top. BUT... if your partner gets the same answer as you, all your counters on that square get knocked off the board. The person with the most counters at the end is the winner!

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
