

Earthquake Safety!

Prepare

Secure your space.

Make sure heavy furniture is fixed to the wall and that loose objects are put away safely.

Make a Plan.

Sit down with your family and make a plan. What do you need? Where will you hide? How will you communicate if you are split up?

Get Supplies

Make sure you have everything you need to survive. This might include tins of food, a first aid kit and torches. Make sure everything is somewhere easy to get to.

Minimise Risk

Make sure your house is structurally safe and that you have insurance to cover any damage that might occur.

Survive

Drop, Cover and Hold on.

When the earthquake begins, get down low, seek cover and hold on tight.

Help if you can.

If it is safe to do so, help your neighbours, look after the injured and make sure you are as safe as possible in case of further tremours.

Recover

Repair.

Come together as a community to repair damage and look after each other. Make sure that vulnerable people are looked after.

Earthquake Survival Kit

An earthquake can be a truly devastating natural disaster. Having a survival kit at the ready could make a big difference to you and your family.

Water

At least 1 gallon per person for 3 days.

Food

At least 3 days worth of tinned food and tin opener.

Radio

Battery powered radio and spare batteries.

Torch

Torch and spare batteries.

First Aid Kit

Plasters, bandages, antiseptic and eye wash.

Whistle

You can use this to signal for help.

Dust Mask

You may also need sheets and duck tape to make a shelter.

Bin Bags

To keep your space hygienic.

Tool Box

Tools will allow you to turn off power and appliances.

Local Map

You may need this to find your way around.

Make sure your survival kit is somewhere that you could easily access in the event of an emergency. It's really important that your whole family know where it is so that everyone is prepared. Keep it well stocked so that you are ready for anything.
